***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 9-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of U.S. Patent No. 6,522,314. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent since the patent and the application are claiming common subject matter, as follows: a flat plasma display employing high voltage for supplying sustain pulse, a voltage detection for detect the high voltage, an internal power supply circuit, an internal power supply control unit, a drive control signal control unit, a display data checking unit ...

***Allowable Subject Matter***

3. The following is an examiner's statement of reasons for allowance:

The present invention related to a flat plasma display for displaying data in accordance with a high voltage and drive voltages produced from said high voltage to reduce power consumption. The independent claim 1 identifying the uniquely distinct features:

“ a first high voltage decision unit determining whether or not said high voltage is at a specific value or within a specific range after a power supply is turned on and initialization is carried out;

a first drive voltage decision unit determining whether or not said drive voltages are at specific values or within specific ranges;

a second high voltage decision unit determining whether or not said high voltage is kept at the specific value or within the specific range after the start of a protective operation of an internal power supply circuit that generates said drive voltages;

a second drive voltage decision unit determining whether or not said drive voltages are kept at the specific values or within the specific ranges; and

a drive control signal control unit controlling drive control signals of said flat plasma display in response to the decided results of said first and second high voltage decision units and said first and second drive voltage decision units”.

The closest prior art of Lower (U. S. Patent No. 4,855,892) and Shimamoto et al. (U. S. Patent No. 5,300,874) show similar systems, but either singularly or in combination, fail to anticipate or render above quoted limitations obvious.

#### ***Response to Arguments***

4. Applicant's arguments, pages 7-9 of the amendment filed February 28<sup>th</sup>, 2003, with respect to claims 1-8 have been fully considered and are persuasive. The 112 rejection of claim 1-8 has been withdrawn. Claim 1-8 are allowable; however, claims 9-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of U.S. Patent No. 6,522,314.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
